## KompoZer Installation

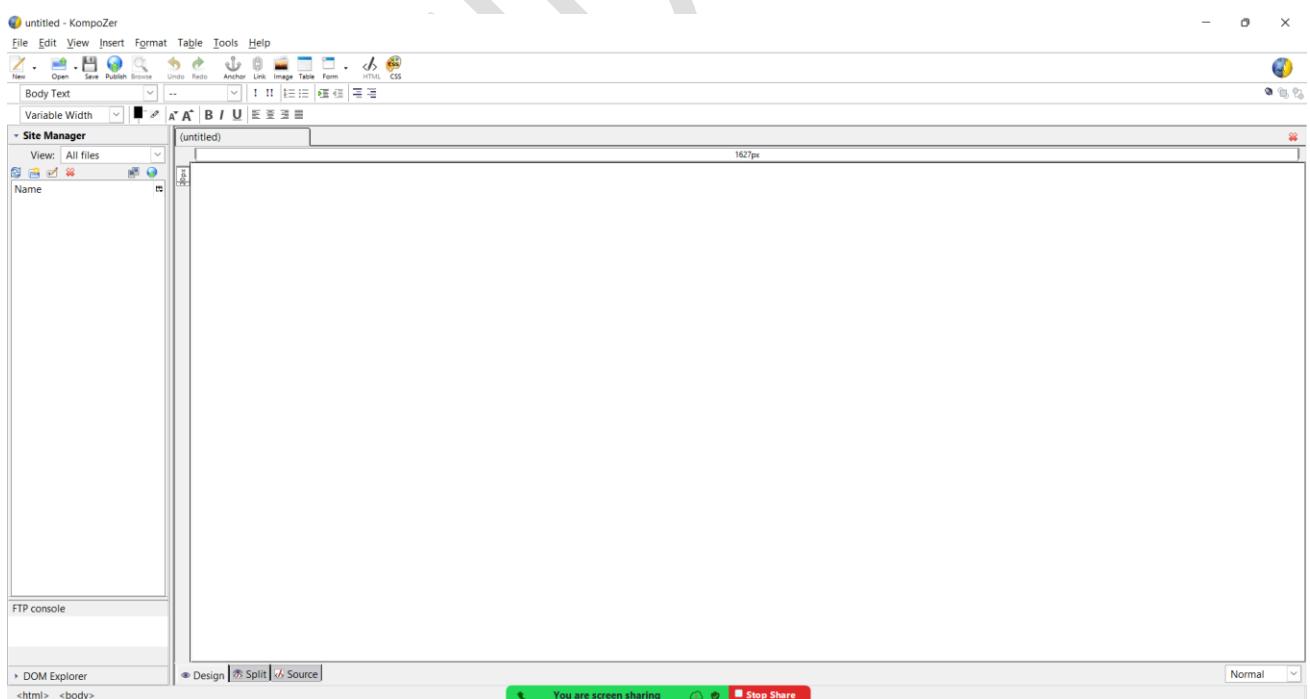

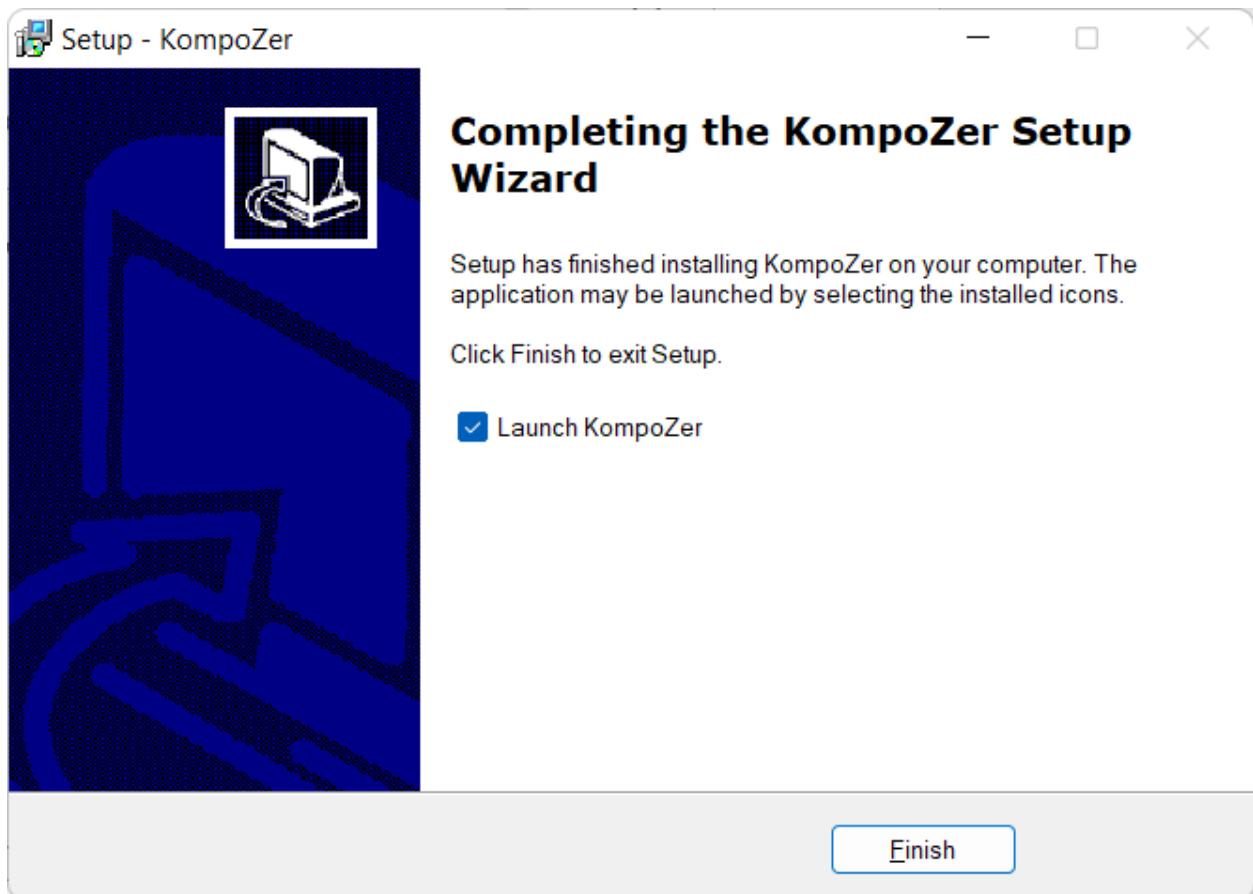

The screenshot shows the SourceForge project page for KompoZer. At the top, there's a navigation bar with links for Help, Create, Join, and Login. Below the bar, there's a search field and a banner for LibreOffice. The main content area features the KompoZer logo, a brief description, and download statistics: 77 reviews, 2,999 downloads this week, and a last update date of 2016-05-30. There are buttons for Download, Get Updates, and Share This. Below these, there are tabs for Summary, Files, Reviews, Support, Wiki, Tickets, Discussion, Donate, Code, Svn, and Mailing Lists. A note states that KompoZer is a wysiwyg HTML editor using the Mozilla Composer codebase, mentioning that Nvu's development has been stopped in 2005. It also highlights fixes for many bugs and adds useful features. Project samples are shown as screenshots of the software interface.

The screenshot shows the first screen of the KompoZer Setup Wizard. The title is "Setup - KompoZer". On the left, there's a decorative graphic of a blue cube with a white icon on it. The main text on the right says "Welcome to the KompoZer Setup Wizard". It informs the user that the setup will install KompoZer 0.8b3 and recommends closing all other applications before continuing. It also provides instructions to click "Next" to continue or "Cancel" to exit. At the bottom, there are "Next >" and "Cancel" buttons.

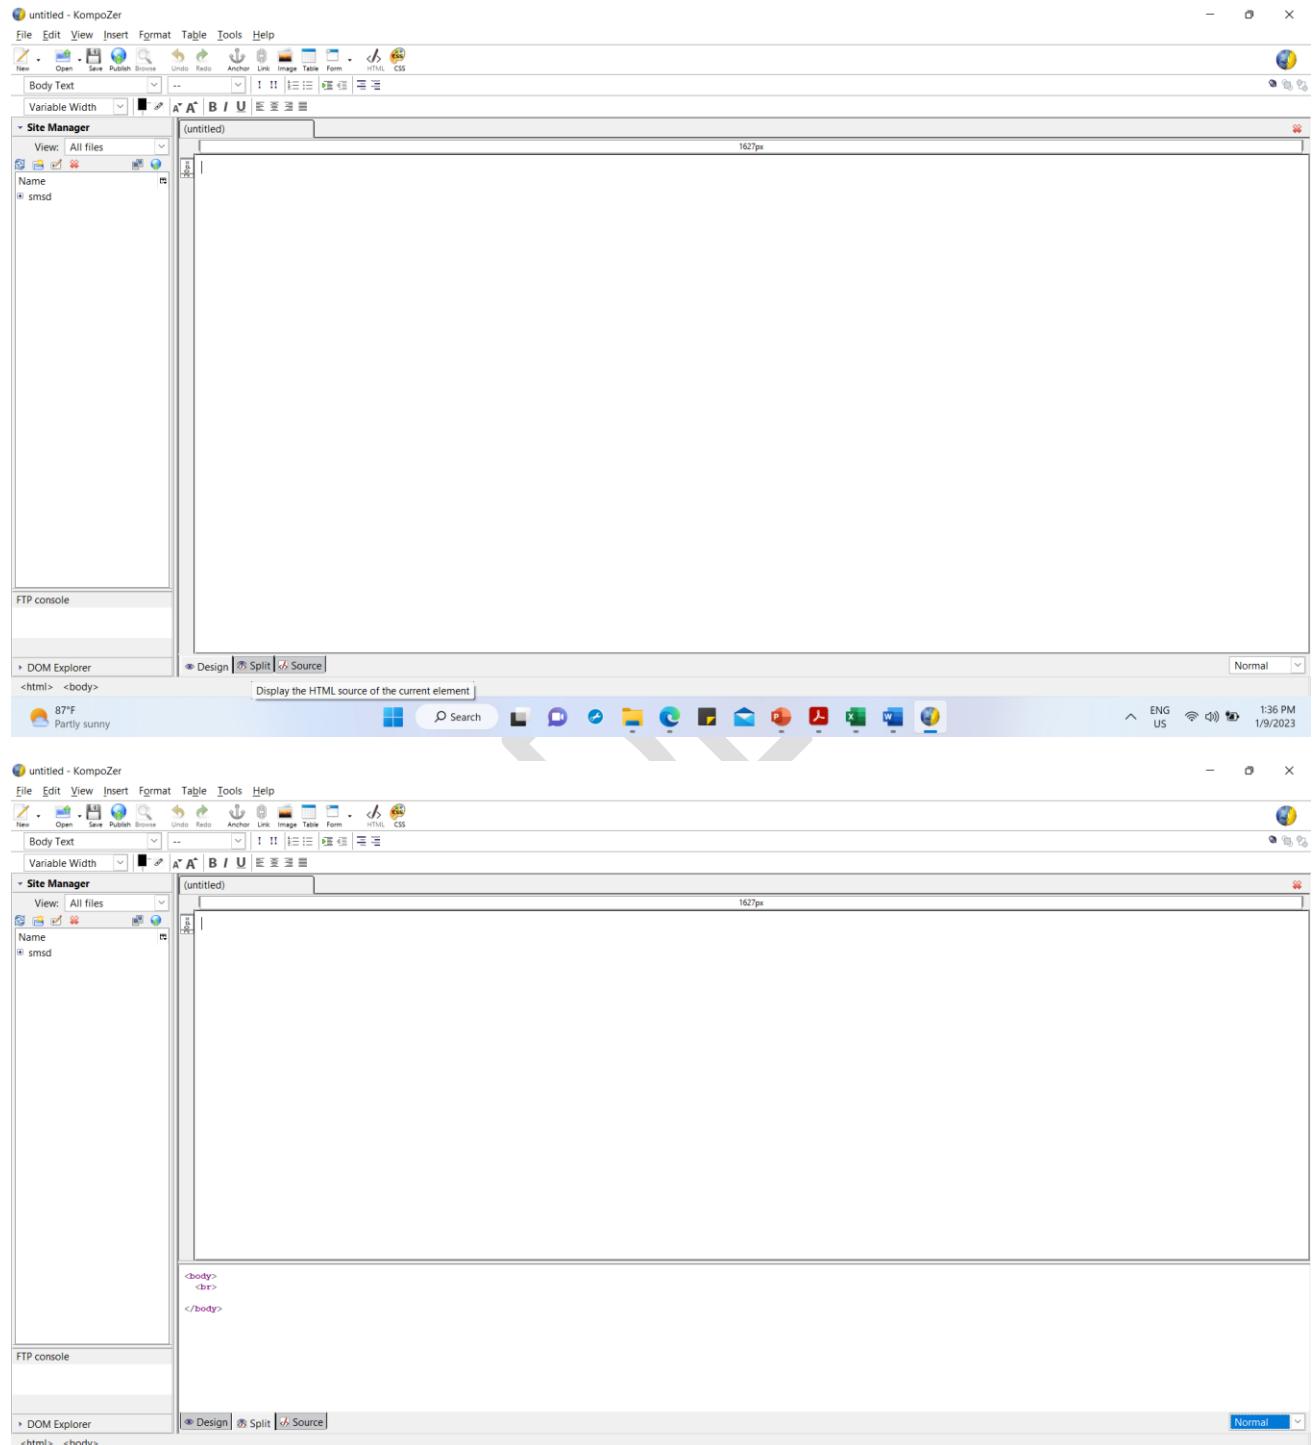

Create a New Page

## Create a New Page

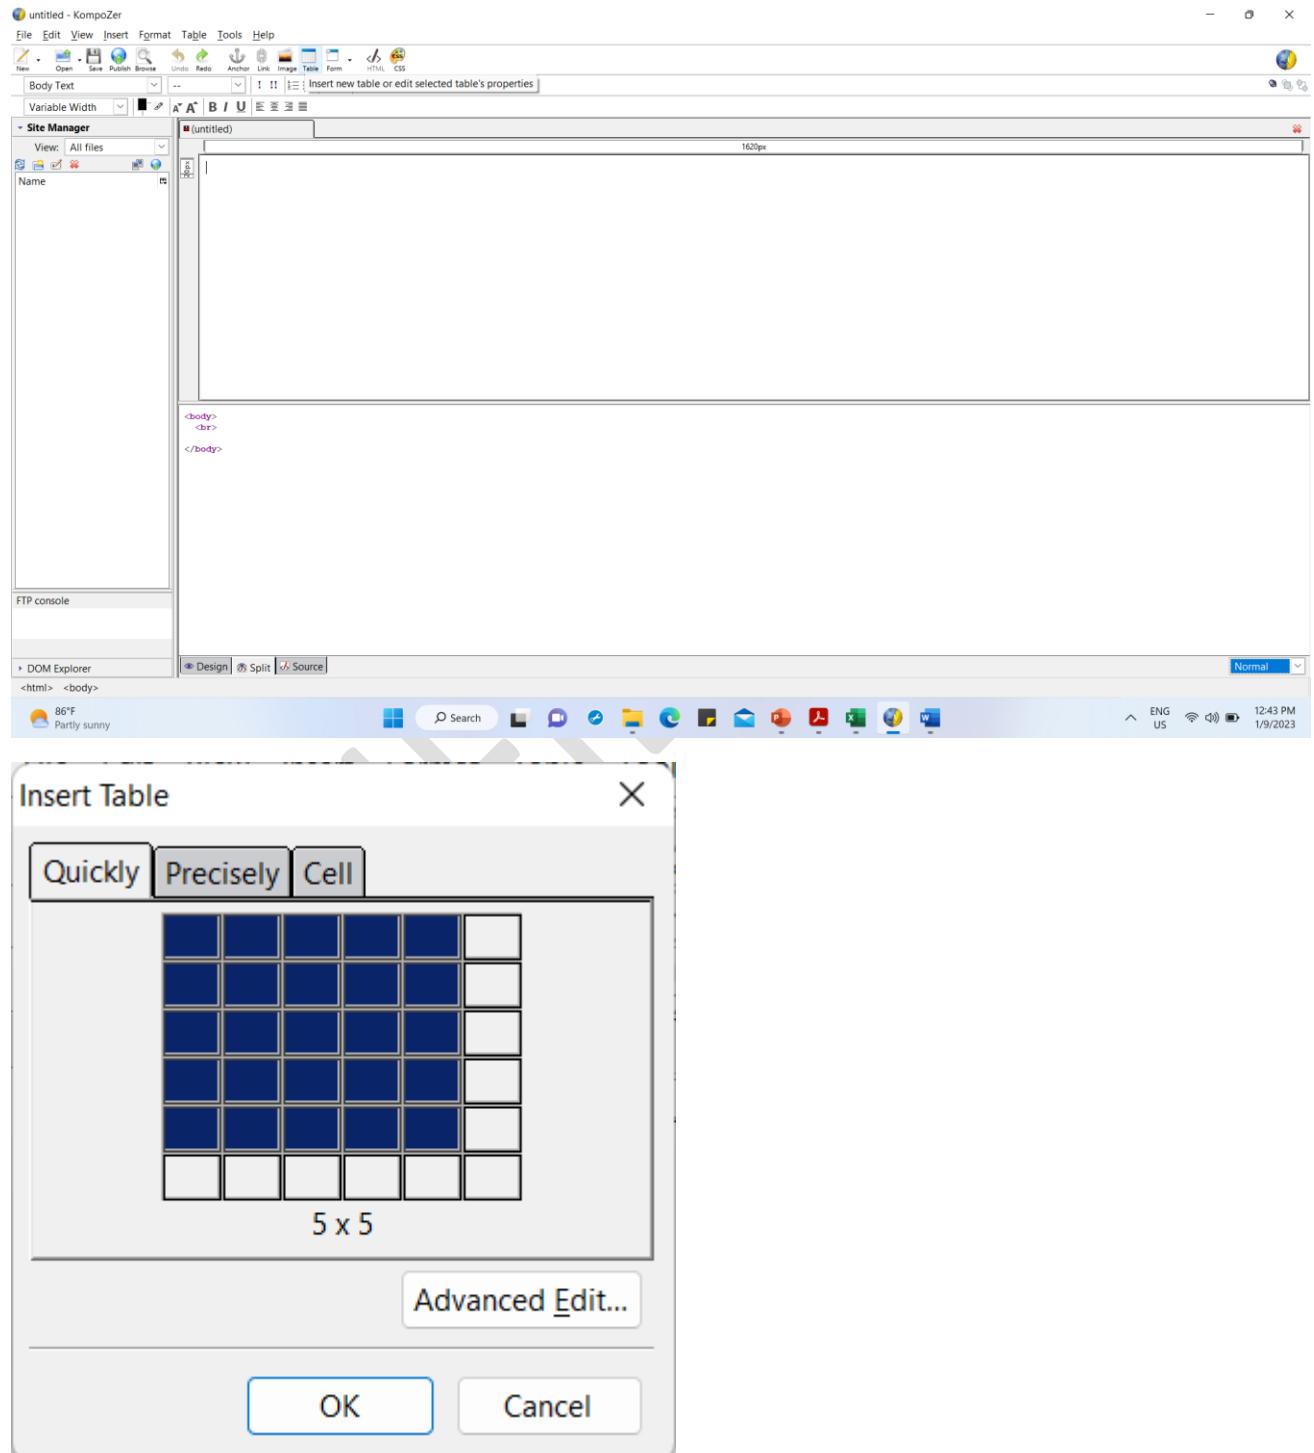

Open KompoZer and click "split"

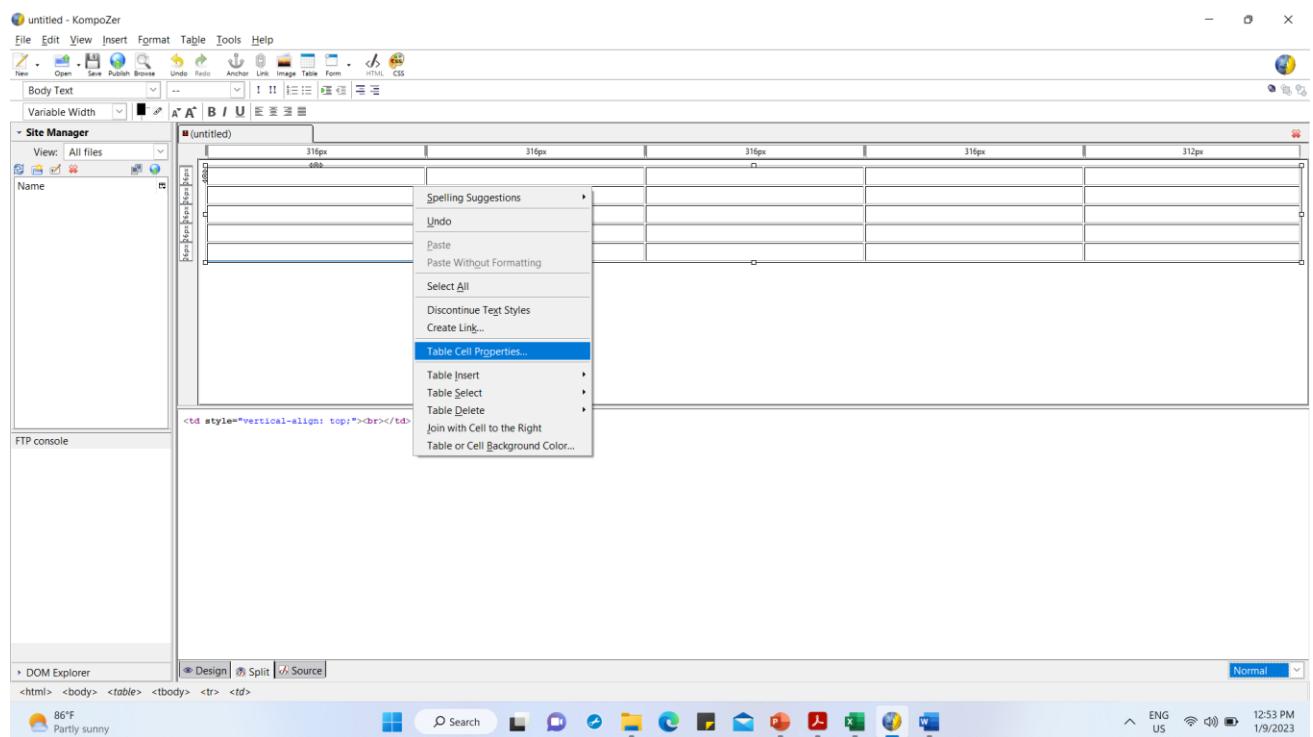

## Create a 5x5 table

### Step 1

Insert a 5 x 5 table into the new page that you created in the previous activity (page 262). For more information about tables, see pages 220-223.

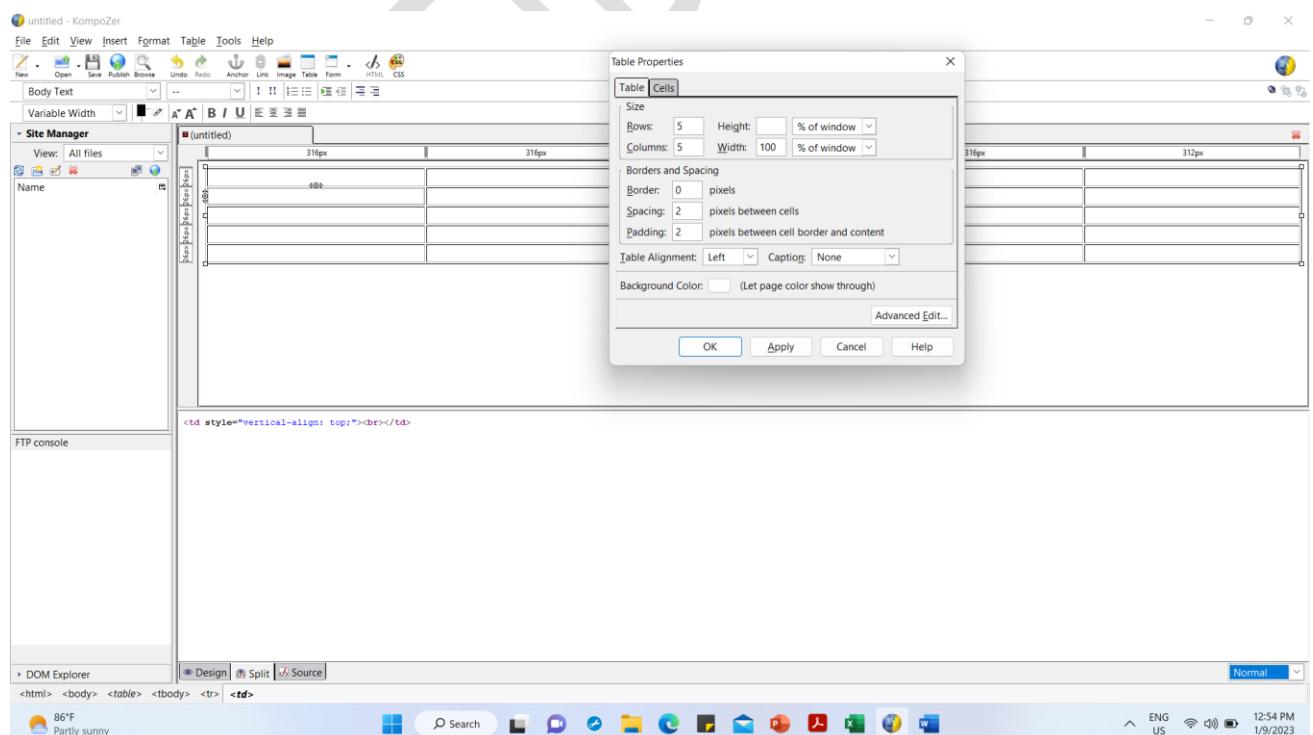

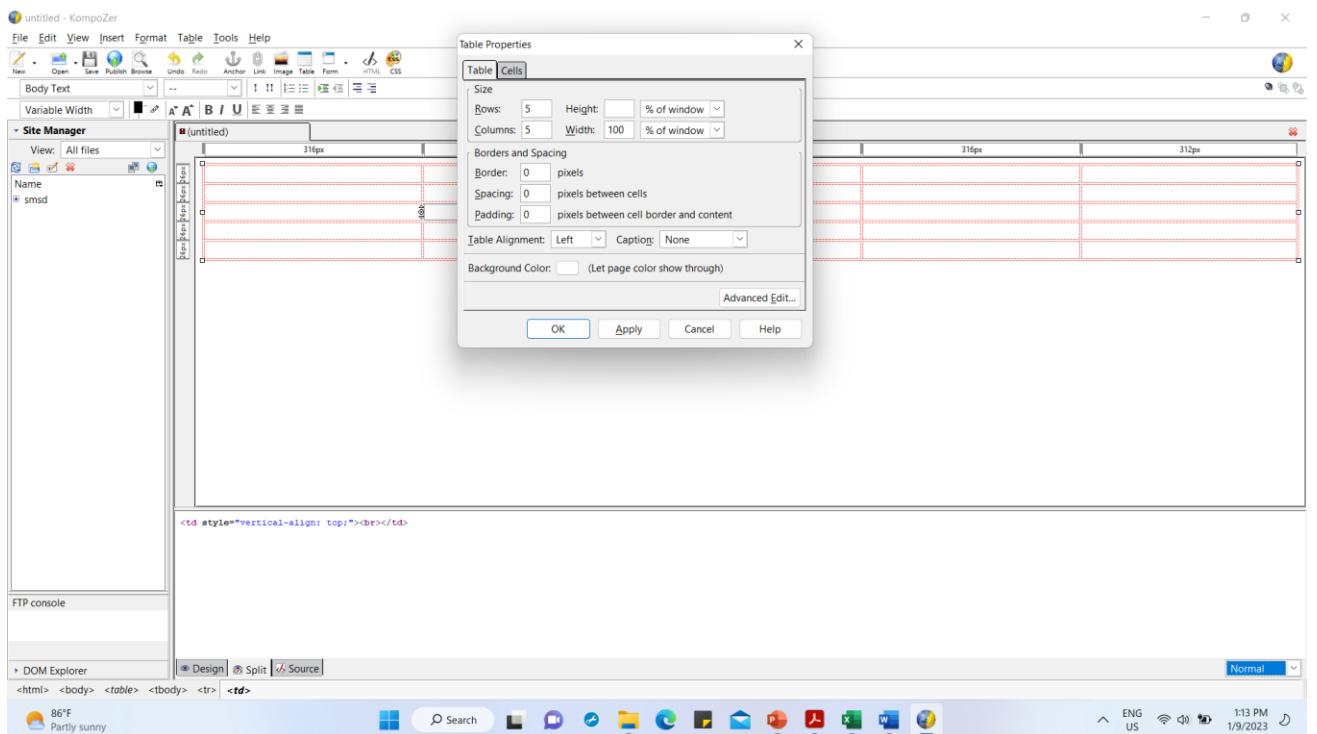

## Step 2

2 Set the table width to 100% so that it will stretch to fit any window size or screen size.

3 Format the table so that its borders will not be displayed by a web browser by setting the border thickness to 0. You will still see guidelines in the application to help you place content in cells.

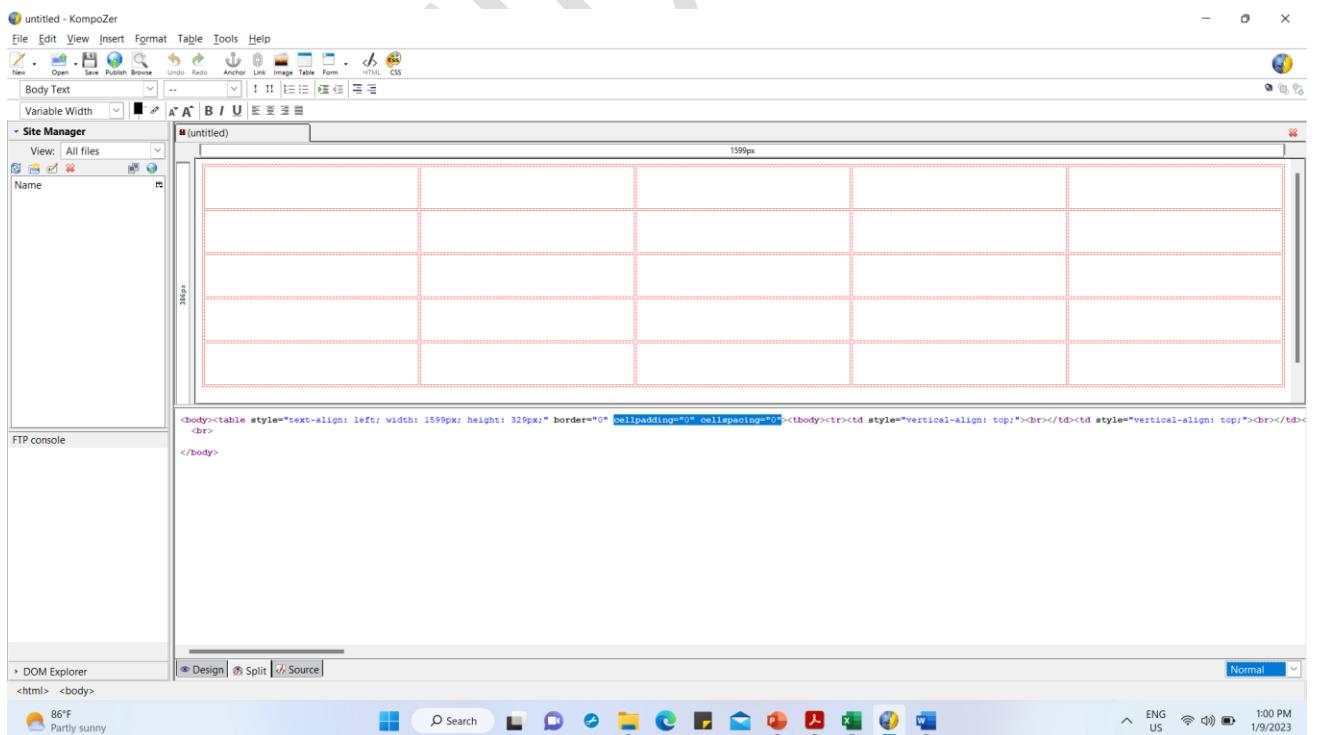

### Step 3

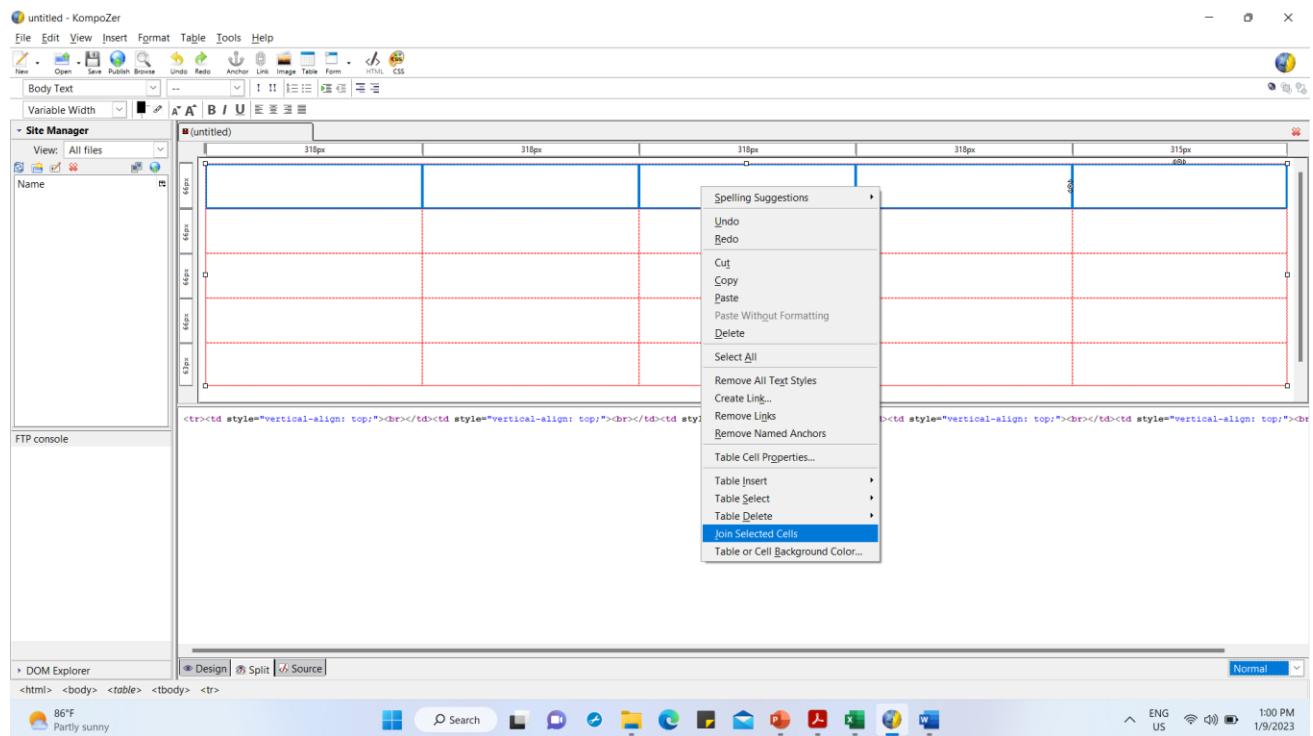

Set all cell padding and cell spacing to 0.

Cursor in table and click Ctrl+A and then go to code

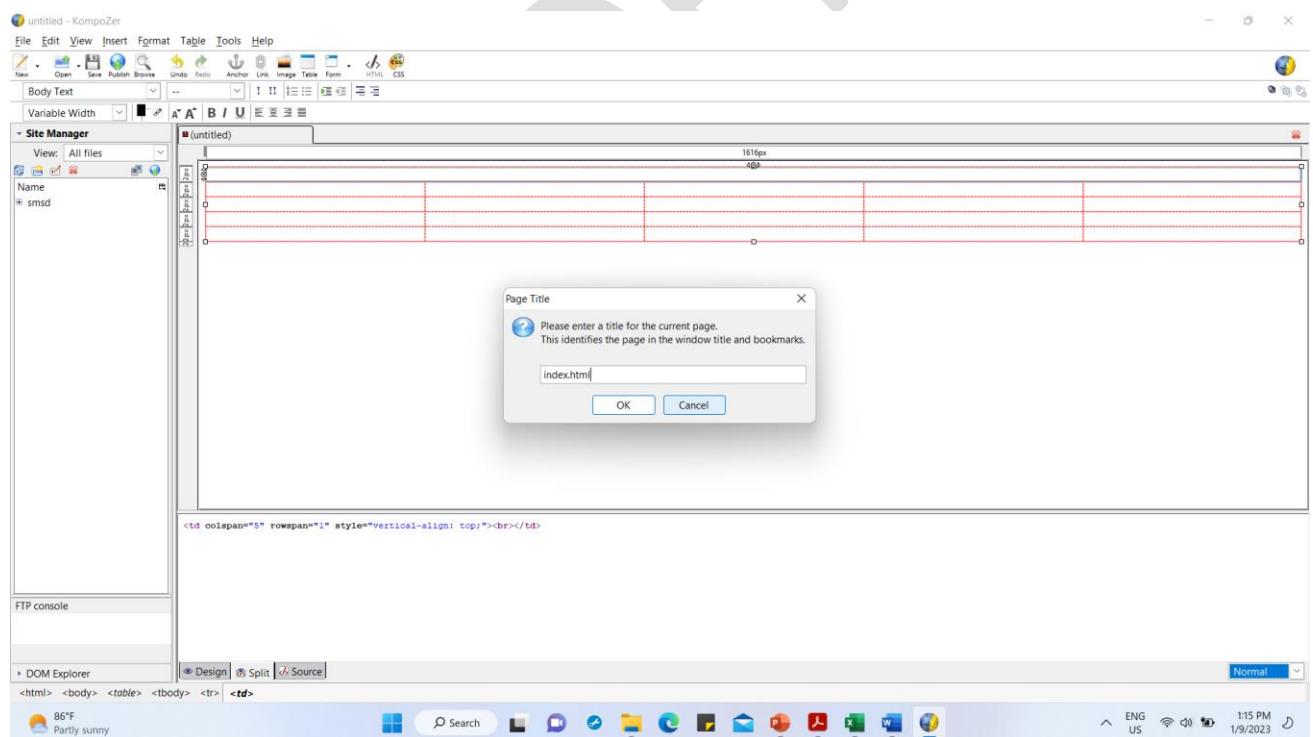

### Step 4

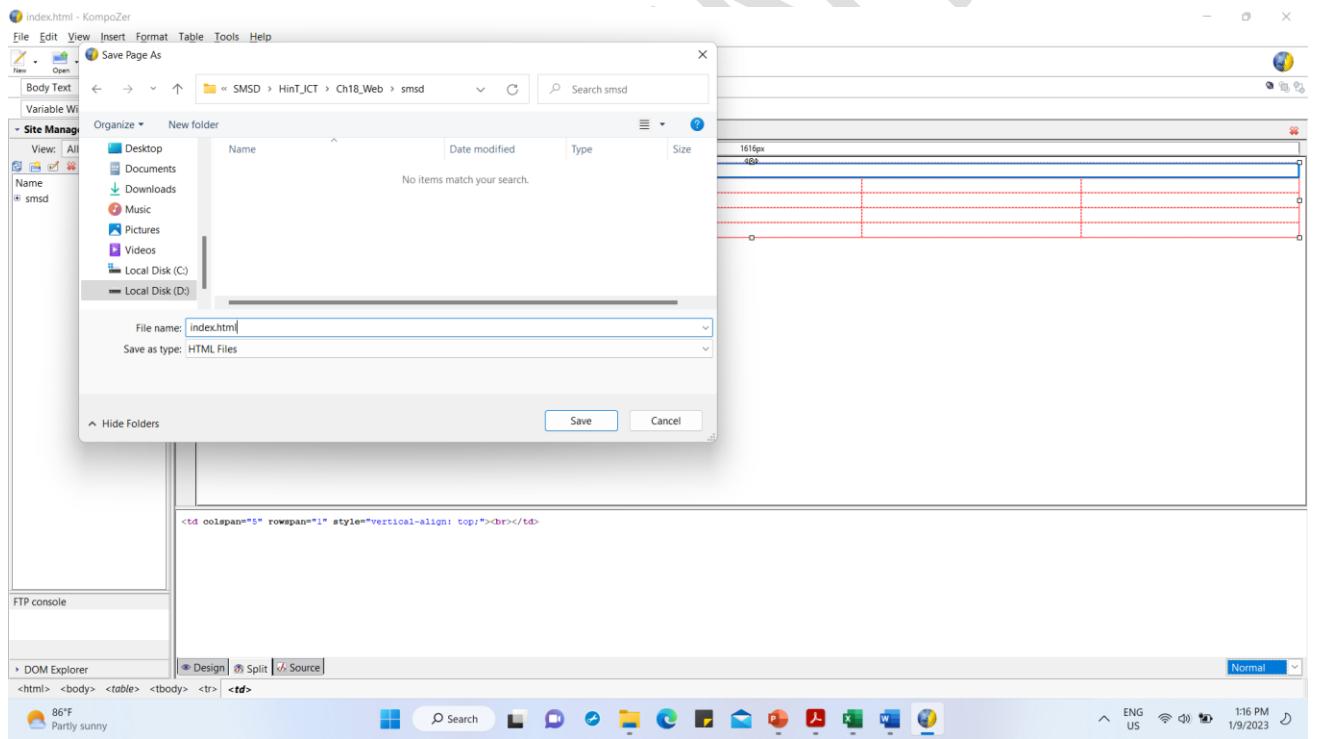

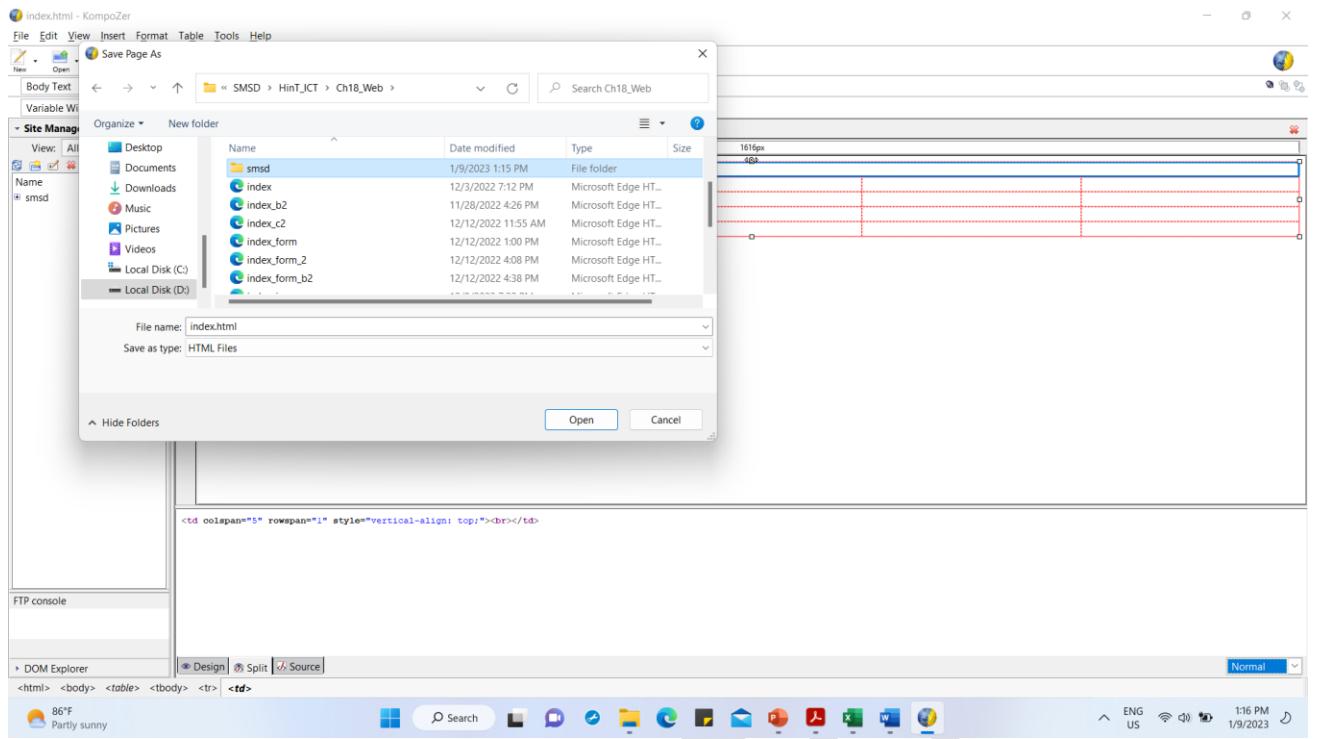

5 Check to make sure your settings match those in Figures 18.2a and 18.2b, then select OK.

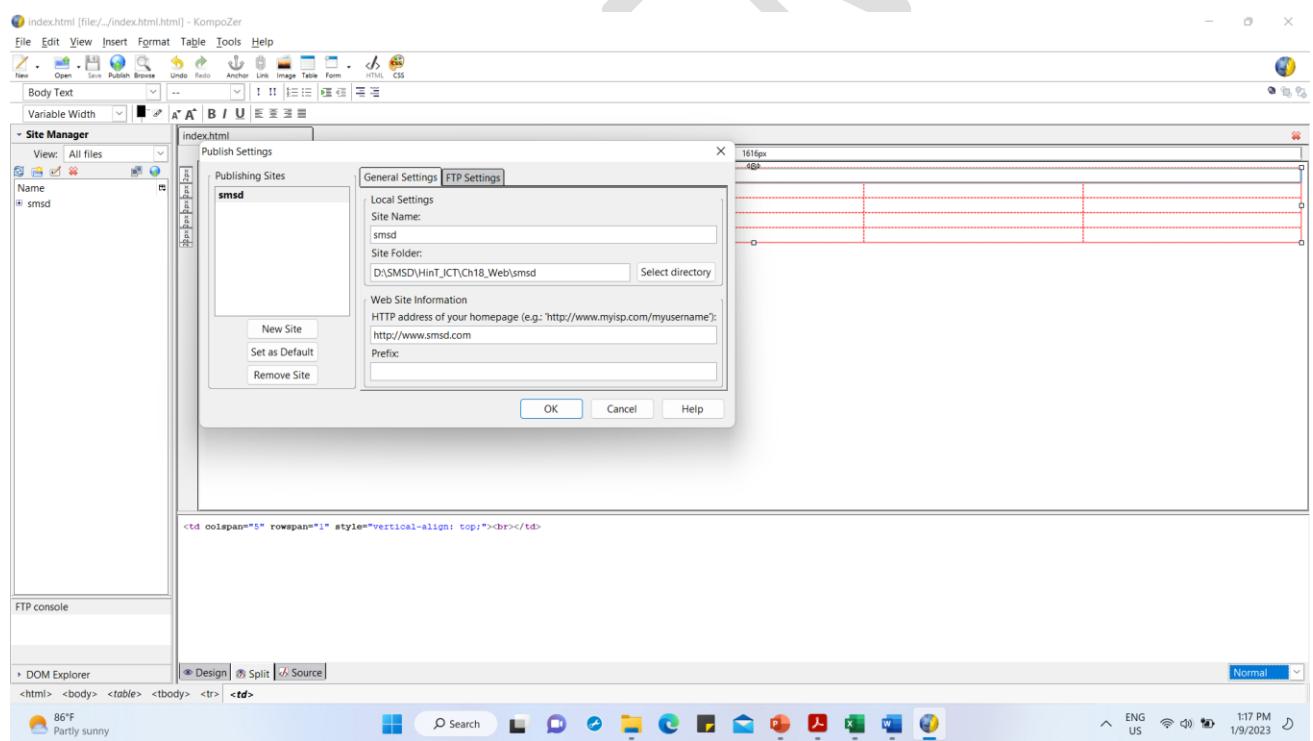

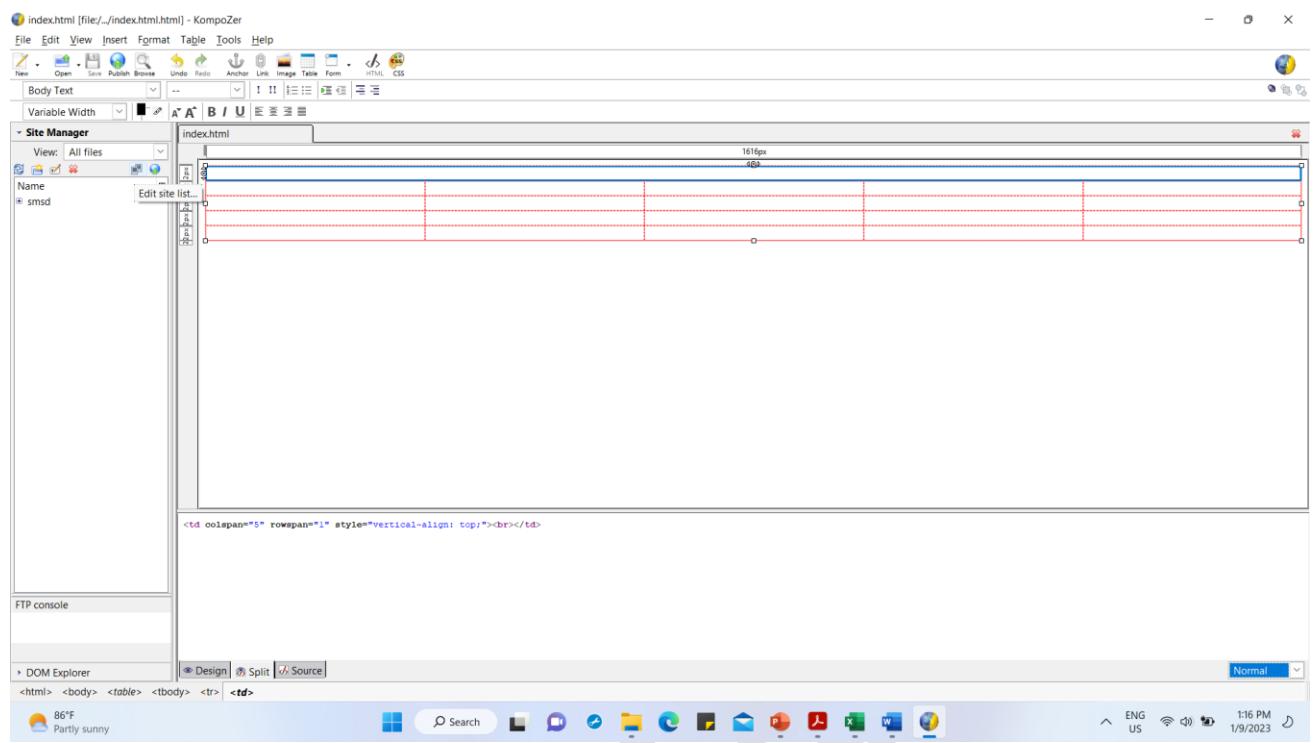

## Save

### File – Save

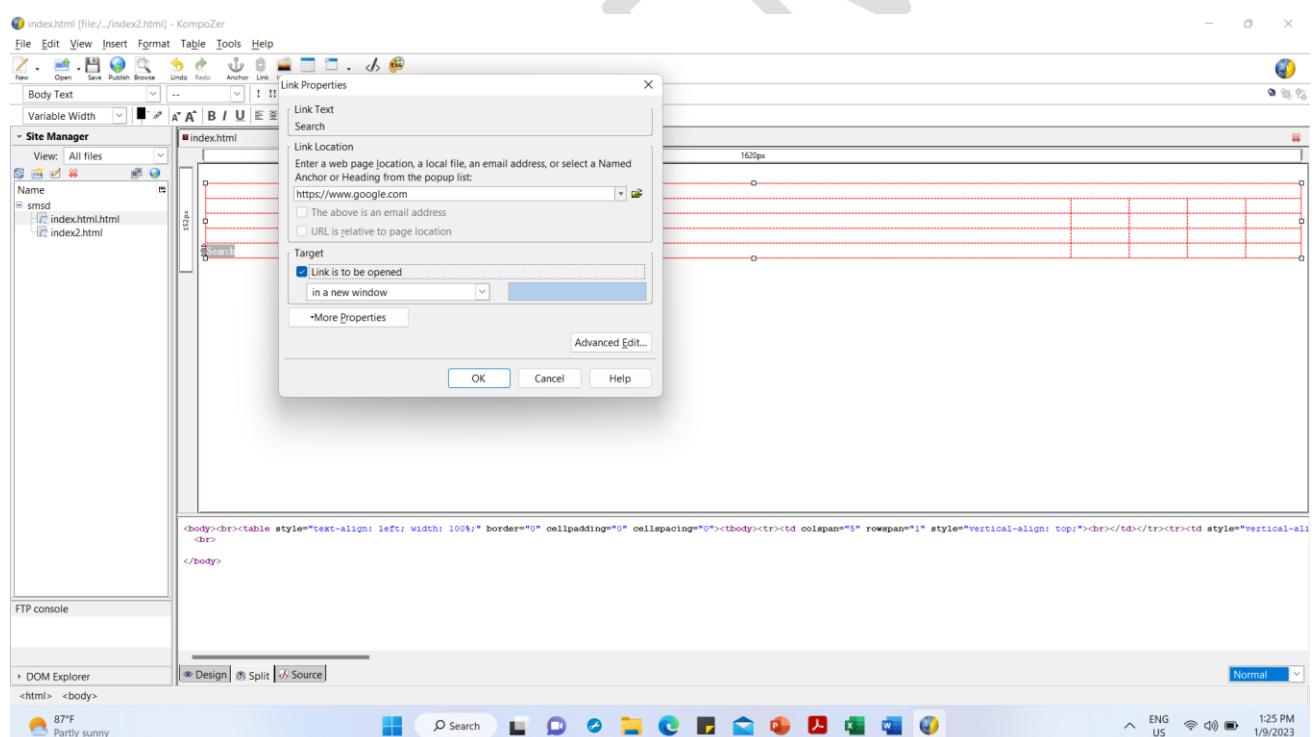

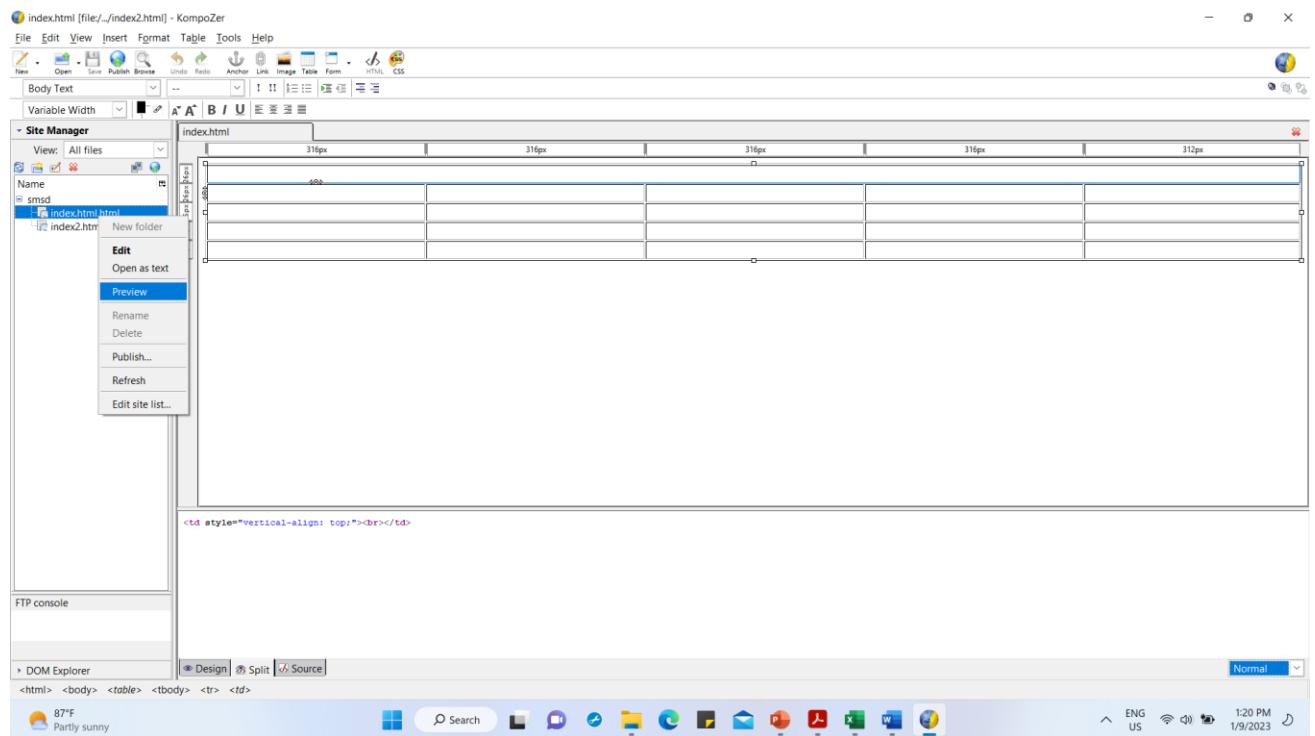

## Edit site list

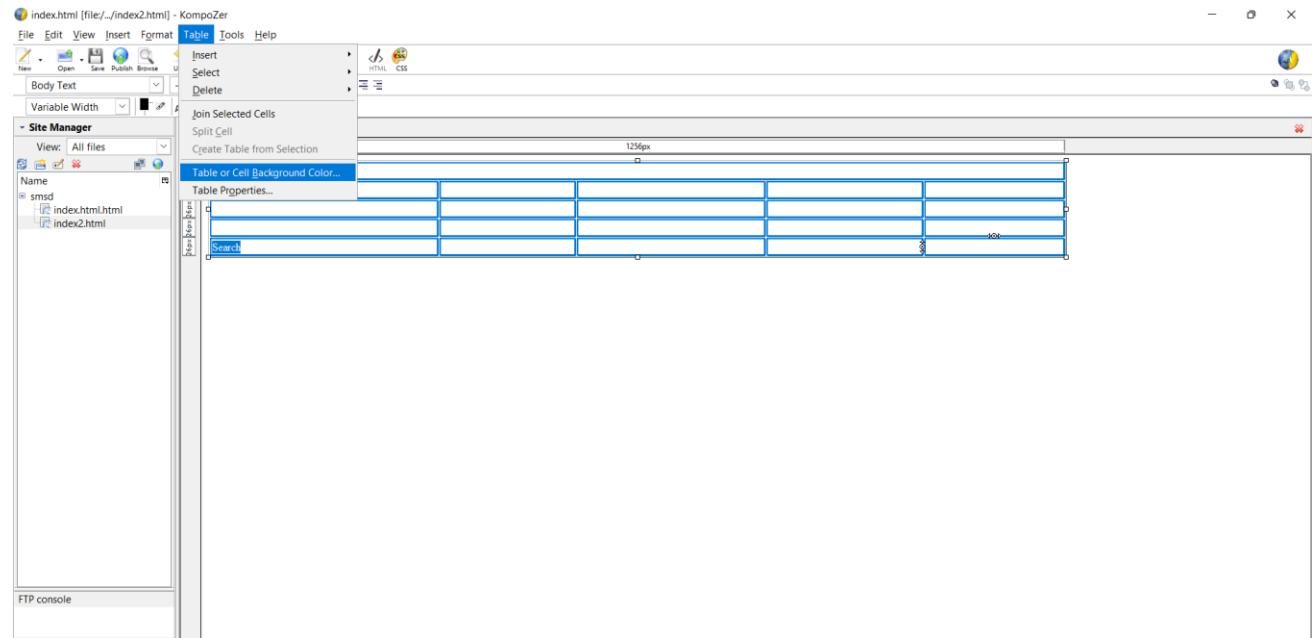

## Preview

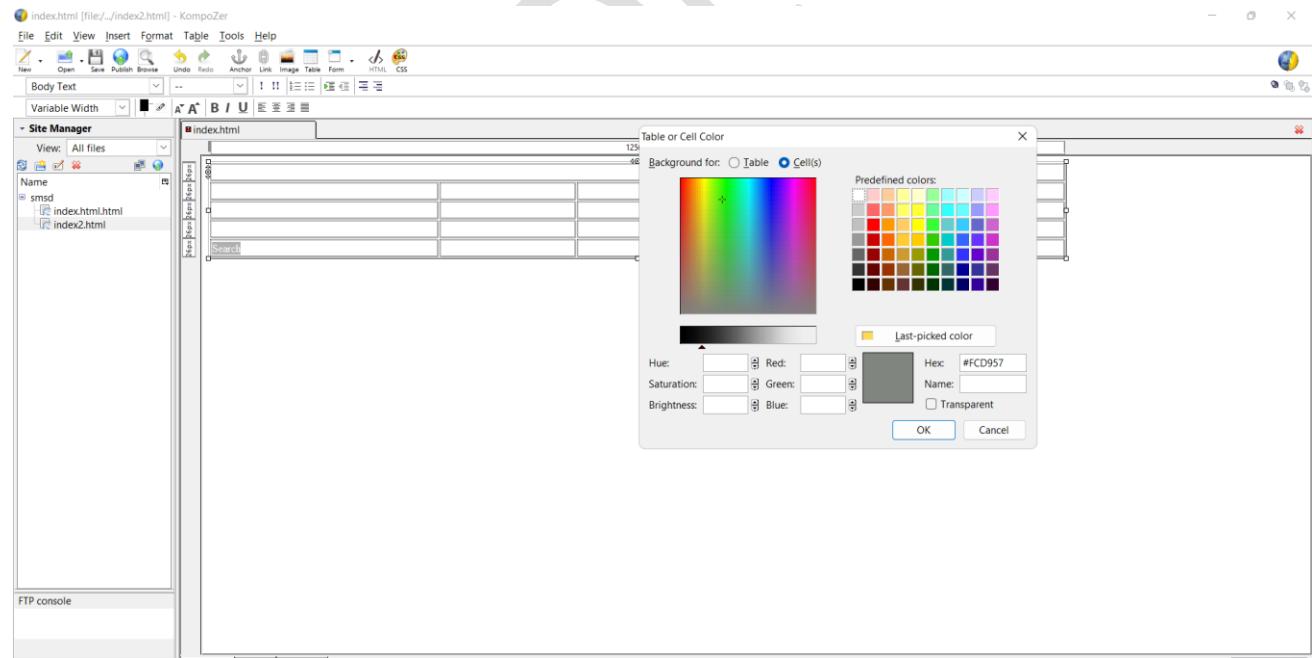

## Table Background Color

Select the table

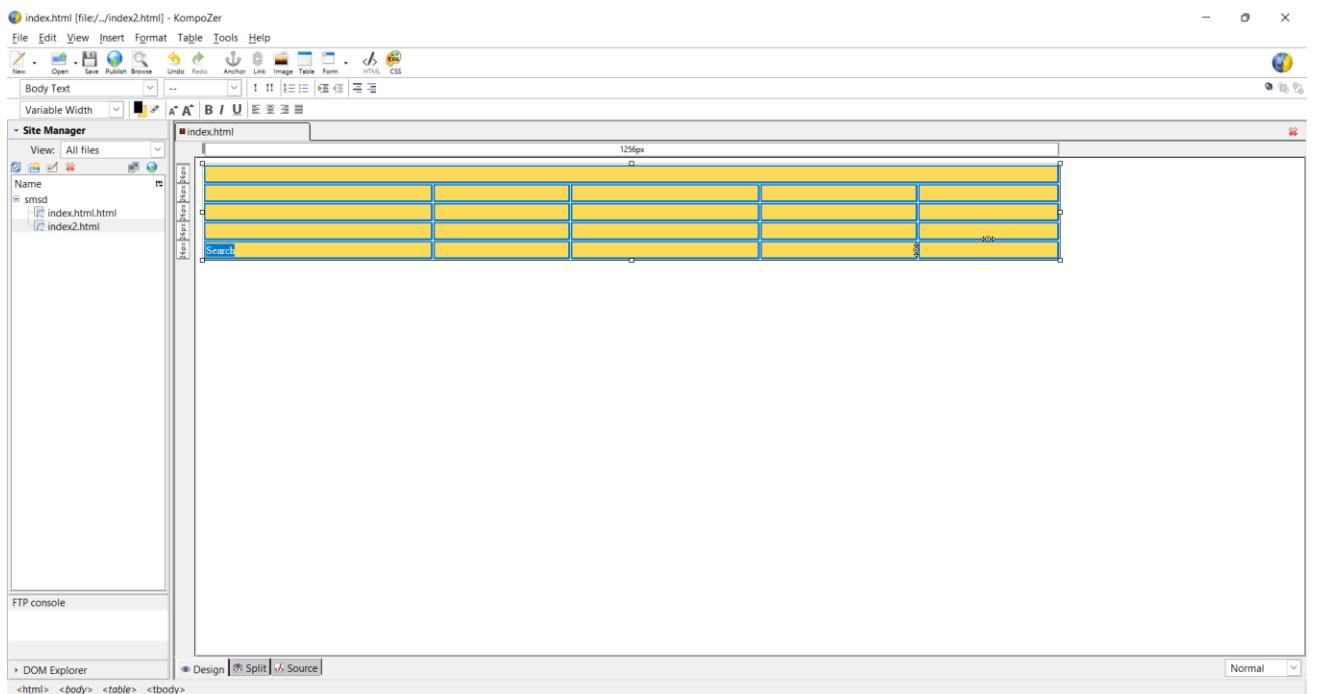

Go to Table and choose Table and Cell Background Color

Transparent check box off

## Paragraph Format

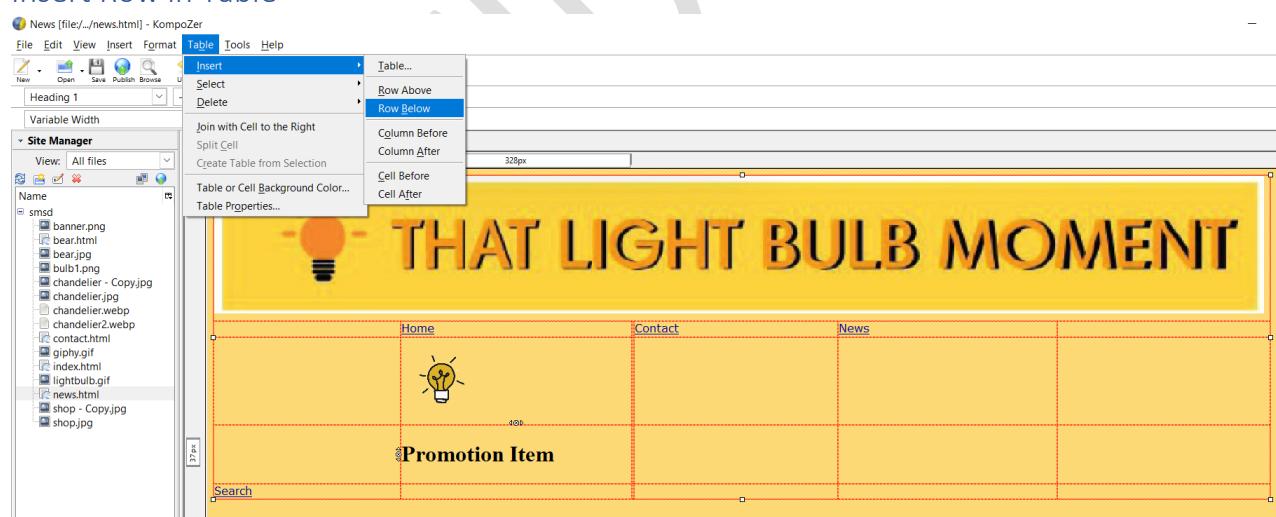

## ADDING CONTENT TO WEB PAGES

1. Using the skills that you have learned in this chapter, add appropriate content to the three web pages that you have created: 'index.html', 'news.html' and 'contact.html'.
2. Ask a friend to give you feedback on the pages.
3. Use the feedback you have received to improve your pages.

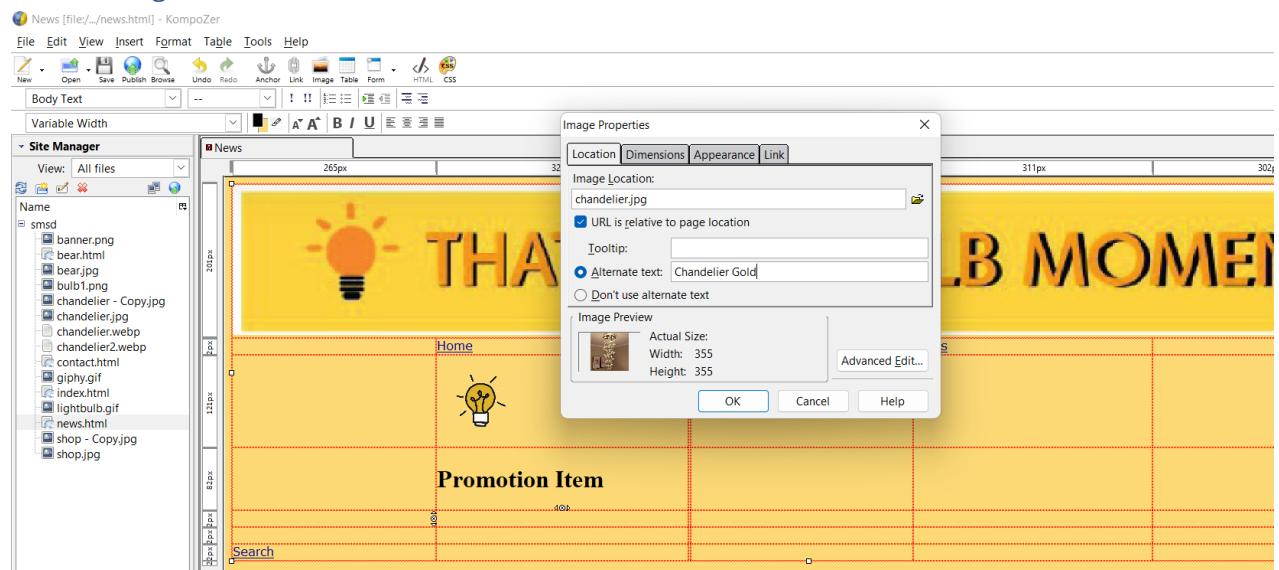

### Heading

### Insert Row in Table

## Insert Image

## Sub Heading

The screenshot shows the KompoZer web editor interface. A yellow banner with the text "THAT'S A GIFT" and a lightbulb icon is visible. A sub-menu for "Heading 2" is open in the toolbar. A "Choose a font" dropdown is also open. An image of a gold chandelier is inserted into the page. The page content includes:

- Header:** THAT'S A GIFT
- Navigation:** Home, Contact, News
- Section:** Promotion Item
- Image:** A gold chandelier hanging from the ceiling.
- Caption:** Chandelier Gold
- Text:** Original Price - \$1500  
Promotion Price - \$1400
- Buttons:** Search
